Professional Experience

Fathom

Remote

SENIOR SOFTWARE ENGINEER

01/2025 - 04/2026

- Built customer-specific healthcare integrations across 8 medical coding automation accounts representing ~\$3M ARR, spanning SFTP data feeds, dbt transformations, coding rules, Airflow/GCP workflows, testing, and production data-flow support in a HIPAA environment.
- Delivered a zero-downtime Epic HL7 upgrade cutover by running parallel Airflow DAG pipelines for legacy and upgraded formats, validating outputs before go-live, and coordinating the timed production switch with customer-facing teams.
- Developed internal CLI audit automation and agentic engineering workflows, ops burden and improving engineer productivity.

AWS EC2

Seattle, WA

SOFTWARE DEVELOPMENT ENGINEER II

04/2021 - 12/2024

- Designed and implemented EC2's next-generation global datacenter metrics ETL pipelines, achieving 100 GB throughput and reducing data aggregation time from 1 hour to 15 minutes
- Developed time series forecasting pipelines for AWS EC2, S3, and EBS services, enabling separate forecasts for GPU and CPU demand, and provided leadership with actionable insights through analyses to inform multi-billion dollar CapEx decisions.
- Architected a scalable RESTful API service using DynamoDB and EC2, streamlining hundreds of internal forecasting workflows.
- Mentored a student intern in developing an internal webpage, managing complex IAM permissions and guiding implementation, resulting in successful project completion.

Amazon

Seattle, WA

SOFTWARE DEVELOPMENT ENGINEER I

11/2019 - 04/2021

- Designed and implemented an automated ML job deployment and scheduling service from scratch for economists, reducing model deployment time from 2 days to 1 hour and enabling version control for reproducibility.
- Collaborated closely with data scientists to optimize and deploy forecasting ML models

Yonder (acquired by PrimerAI)

Austin, TX

DATA ENGINEER

07/2018 - 11/2019

- Implemented a high-performance web scraping infrastructure, capable of processing over 1 million URLs daily, significantly enhancing data collection capabilities for the company's core analytics platform.
- Developed a robust, asynchronous queue-based messaging service to facilitate efficient communication between internal applications, improving system reliability and scalability.

Education

Swarthmore College

Swarthmore, PA

BACHELOR OF SCIENCE IN COMPUTER SCIENCE, MINOR IN CHEMISTRY

2014 - 2018

- Relevant Coursework: Machine Learning, Statistics, Computer Vision, Artificial Intelligence, Bioinformatics, Parallel and Distributed Systems

Udacity

Remote

ONLINE CERTIFICATE

2019

- Intro to Self-Driving Cars

GRADUATE COURSEWORK

- Georgia Tech online coursework: AI for Robotics, Machine Learning, Machine Learning for Trading, Bayesian Statistics

Skills

Programming

Python (Proficient), Java, SQL, JavaScript, Pandas, NumPy, Scikit-learn

Data & Cloud

AWS (EC2, S3, DynamoDB, Lambda), GCP, Apache Airflow, dbt, Docker, CI/CD pipelines, Git, Linux

Agentic Workflows

Claude Code/Cursor/Codex, OpenClaw, prompt engineering

Concepts

Distributed Systems, Serverless Architecture, RESTful APIs, ETL, HIPAA, Data Structures & Algorithms

Languages

English (Native), Korean (Intermediate)

Leadership Experience

Beacon Hill Church

Seattle, WA

SMALL GROUP LEADER & STUDENT MINISTRIES COORDINATOR

2020 - Present

- Lead weekly small group of 6-12 young adults, fostering community and spiritual growth
- Developed and led a student ministries program, engaging 30+ middle and high school students while managing and mentoring a team of 8 young adult counselors

Swarthmore College

Swarthmore, PA

RESIDENT ASSISTANT

2015 - 2016

- Fostered a supportive community for students. Organized educational and social events to promote student engagement
